

BEFORE PROJECT START

Permits & approvals

New Jersey

Every city regulates a drone cleaning job a little differently. Here is what each market requires before work begins — SpiderJet coordinates and files it as part of project planning.

1 Property-owner authorization ☐

Written permission to take off and land on the property. New Jersey has no statewide drone launch permit.

2 FAA airspace authorization ☐

Near Newark, Teterboro, Morristown, Trenton, Atlantic City and Philadelphia airports, plus temporary flight restrictions such as Bedminster.

3 Street opening / obstruction permit ☐

When the van or equipment occupies a town street or sidewalk. County roads go through the county engineer, state highways through NJDOT.

4 Local ordinance check ☐

Each town's code is reviewed for launches from public property and quiet hours for night and weekend work.

5 Historic preservation commission ☐

Certificate of Appropriateness for exterior work in local historic districts such as Jersey City, Hoboken and Newark.

6 Stormwater compliance ☐

Town ordinances keep wash water out of storm drains, so runoff is captured and disposed of with the local sewerage authority.

7 Cleaning-product compliance ☐

Registered mold and algae treatments follow NJDEP Pesticide Control Program rules.
